

Modifications of SG MARK Awarded Project

In the instance that modifications have been applied to the project awarded with the Mark, including product specifications and performance enhancements, the award winner must submit an Alteration Report to the organiser.

The organiser and then-presiding Judging Committee will then deliberate the extents of the modifications made (i.e. if the changes made conflict with the prior evaluation) and advise the winner of their decision to approve or reject of the continued usage of SG Mark for that specified project.
